Education

Carnegie Mellon University (Incoming)

Master of Computational Data Science

Aug. 2026 - Expected Dec. 2027

Pittsburgh, Pennsylvania, USA

International Institute of Information Technology - Hyderabad

Bachelor's of Technology in Computer Science (GPA 8.8/10.0) &

Master's of Science in Computational Natural Sciences (GPA 8.8/10.0)

Nov. 2021 - July 2026

Hyderabad, Telangana, India

Experience

Stripe, Inc.

May 2025 – Jul 2025

Software Engineering Intern

Bengaluru, India

- Owned the design and implementation of a multi-currency charge lookup workflow within **Stripe's Support Chatbot**, enabling self-service investigation of unrecognized transactions across global payment networks.
- Built secure state-driven workflow orchestration for *handling sensitive financial data*, ensuring compliance with enterprise security requirements while maintaining a seamless support experience.
- Launched the feature to **100% of Stripe's global user base**, reducing support case creation by $\sim 120/\text{week}$; achieved $\sim 90\%$ test coverage and received a **full-time return offer**.

Uber Technologies, Inc.

May 2024 – Jul 2024

Software Engineering Intern (UberSTAR)

Hyderabad, India

- Engineered a **full-stack compliance dashboard** using Go, TypeScript, Redux, and Fusion.js to streamline entity verification workflows across global markets.
- Architected a configuration-driven UI framework that dynamically rendered workflows from JSON specifications, eliminating hardcoded regional business logic and improving maintainability.
- Abstracted complex regulatory requirements into reusable configurations that accelerated market onboarding and scaling across user, role, and environment types; received a **return internship offer**.

Research Experience

CCNSB Lab, IIIT Hyderabad

May 2024 – May 2026

Research Assistant (2 published papers)

Hyderabad, India

- Led a first-author study across 672 multi-organ datasets, developing ML feature-ranking pipelines to discover a universal 20-gene biomarker panel ($AUC > 0.96$). (**Accepted at PLOS ONE journal**).
- Implemented graph pipelines using *Leiden clustering* and *Jaccard similarity* to map and isolate high-dimensional regulatory patterns across massive datasets.
- Co-developed **HyperCLSA**, a deep learning framework combining Hypergraph Neural Networks and Contrastive Learning for multi-omics breast cancer subtyping, achieving **90.1% accuracy** on TCGA-BRCA (n=850) and **accepted at PReMI 2025**.

Projects

IDD Filtering Engine | React, Node.js, MongoDB, Elasticsearch, MinIO

- Designed and deployed a semantic search and filtering platform for the **Indian Driving Dataset (IDD)**, a national-scale autonomous driving dataset initiative supported by **iHub-Data, DST Government of India**, enabling researchers to generate custom dataset subsets using object-level and scene-level metadata.
- Designed a high-performance retrieval pipeline using *Elasticsearch* for metadata querying and *MinIO* for scalable object storage, and successfully integrated the system into the official Data Foundation portal for use by research labs.

Distributed NFS & C-Shell | C, Linux, TCP/IP Socket Programming, Multithreading

- Built **core operating-system infrastructure from scratch**, including a distributed network file system with centralized Naming Servers and concurrent Storage Servers supporting file creation, lookup, replication, and retrieval across a network.
- Developed a **Unix-like shell** supporting process management, piping, I/O redirection, signal handling, background execution, and custom built-in commands, leveraging low-level Linux system calls and multithreaded client communication.

Technical Skills

- Languages:** Python, R, C++, C, Go, TypeScript, JavaScript, Ruby, SQL, Bash
- Frameworks & Libraries:** React.js, Node.js, Redux, Express.js, Fusion.js, PyTorch, Scikit-learn, Jest, Next.js
- Systems & Architecture:** Distributed Systems, Microservices, Network Protocols, Linux Systems Programming
- Storage & Tooling:** Elasticsearch, MongoDB, MinIO, Docker, Git, Graph/Network Analysis, PostgreSQL

Achievements & Leadership

- Google Women Engineers Scholar** – Selected among the **Top 100 women engineers nationwide**; scholarship of INR 100,000.
- UberSTAR** – Selected among the **Top 35** women engineers from **Tier-1 institutions** across India.
- KVPY Fellow (All India Rank 298)** – **National fellowship** awarded to the top 0.6% of applicants.
- Megathon Winner** – Secured **1st place** in Hyderabad's largest student-run hackathon.
- Leadership:** President, **Women in Tech Club (LeanIn)** and Vice President, **Entrepreneurship Cell (E-Cell)**, IIIT Hyderabad;
- Teaching:** Head Teaching Assistant for **Machine Learning in Natural Sciences** and **Computer Programming**; Teaching Assistant for **Statistical Methods in AI**, **Intro to Software Systems**, and **Algorithm Analysis and Design**.
